Welding Robot Technician

Buyers Products company, a leading manufacturer in the work truck industry, is searching for a Welding Robot Technician to run production, write, edit, troubleshoot robotic welding programs for production weldments.

Primary Job Duties:

- Program robots to weld new jobs on multi-arm robotic cells.
- Setup and maintain Fanuc robotics work centers.
- Set welding parameters to ensure welds meet size, quality, and location specifications.
- Able to read blueprints.
- Drive the continuous improvement of all setup programs & work cell setups.
- Monitor work cell production quotas on an hourly basis.
- Assure that ISO quality policies and procedures are being followed.
- Maintain a strong culture of safety and good housekeeping.

Skills/ Experience:

- Solid understanding of the GMAW welding process
- Experience in production welding of aluminum
- Experience maintaining gooseneck and tool center-point calibration standards.
- Ability to troubleshoot weld quality issues.
- Highly motivated self-starter with proactive approach to attacking opportunities.
- Capability to be flexible with growth in a rapidly expanding business.
- Strong Teamwork
- Critical thinking and problem-solving skills
- Planful and organized.

Education Background:

- High School Diploma or equivalent
- Formal FANUC coursework completed is preferred.
- Experience with Fronius welding machines is preferred.
- 3-5 years of experience writing and tracing programs on complex weldments.
