Design Engineer

Buyers Products Company, a leading manufacturer in the work truck industry, is searching for a Design Engineer to complement the skills and talents of our Engineering Team.

Primary Job Duties:

- Develop and design products from concept to production – working with internal and external customers as required.
- Design mechanical assemblies, weldments, castings, forgings, plastic and Sheetmetal components using PTC Creo.
- Provide engineering support for existing products at the manufacturing facility.
- Develop and implement product and process improvements.
- Assessing a design brief to gauge the design requirements.
- Conducting and/or using research on user experience and needs, current market trends and general functionality.
- Developing solutions that solve user problems.
- Evaluating design solutions against industry standards and regulations

Skills/ Experience:

- Ability to define problems, collect data, establish facts, and draw valid conclusions.
- Ability to read, analyze and interpret documents and technical procedures.
- Ability to write extensive reports.
- Ability to effectively present information and respond to questions from a group of supervisors and/or management personnel or on a one-on-one situation with employees of the organization.

Education Background:

- B.S. from an accredited college in mechanical engineering
- 5 years of experience in design w/emphasis on sheet metal.
- 3.0+ minimum GPA.
- Solid modeling experience required.

Physical Requirements and Work Environment:

- Mobility and dexterity to move around office settings including accessing file cabinets or storage and navigating to different workstations.
- Must be able to remain stationary for extended periods of time and engage in some repetitive motion.
- Standing, walking and sitting for extended periods of time.
