

Robot Technician

Buyers Products company, a leading manufacturer in the work truck industry, is searching for a Robot Technician to write, edit, and troubleshoot robotic welding programs for production weldments. They would be an integral member of the production welding department and ensure all production robot cells are running safely and efficiently.

Primary Job Duties:

- Program robots to weld new jobs on multi-arm robotic cells.
- Setup and maintain Fanuc robotics work centers.
- Set welding parameters to ensure welds meet size, quality, and location specifications.
- Able to read blueprints.
- Drive the continuous improvement of all setup programs & work cell setups.
- Monitor work cell production quotas on an hourly basis.
- Assure that ISO quality policies and procedures are being followed.
- Maintain a strong culture of safety and good housekeeping.

Skills/ Experience:

- Knowledge of “seam tracking” and “touch sensing,”
- Solid understanding of the GMAW welding process
- Experience maintaining gooseneck and tool center-point calibration standards.
- Ability to troubleshoot weld quality issues.
- Highly motivated self-starter with proactive approach to attacking opportunities.
- Capability to be flexible with growth in a rapidly expanding business.
- Strong Teamwork
- Critical thinking and problem-solving skills
- Planful and organized.

Education Background:

- High School Diploma or equivalent
- Formal FANUC coursework completed is preferred.
- 3-5 years of experience writing and tracing programs on complex weldments.

Physical Requirements and Work Environment:

- Mobility and dexterity to move around office settings including accessing file cabinets or storage and navigating to different workstations.
- Must be able to remain stationary for extended periods of time and engage in some repetitive motion.
- Standing, walking and sitting for extended periods of time.
- Mobility and dexterity to move around operating machinery and powered industrial equipment.
