

TECHNICAL SERVICE BULLETIN

NUMBER	16TSB-38	TYPE	INSTALLATION ALERT		
TITLE	STAINLESS STEEL FASTENERS/EYEBOLTS				
REV	A	ISSUED	8/17/2010	REVISED	-
AFFECTS	ALL PLOWS				
INFORMATION	SNOWDOGG USES A WIDE RANGE OF STAINLESS STEEL FASTENERS THROUGHOUT THE PLOW LINE TO ELIMINATE CORROSION AS A SERVICE ISSUE. STAINLESS STEEL FASTENERS, HOWEVER, CAN GALL WHEN ASSEMBLED WITHOUT LUBRICATION AND WITH HIGH SPEED TOOLS (IMPACT, ETC.)				
INSTRUCTIONS	WHEN ASSEMBLING STAINLESS STEEL FASTENERS (EYEBOLTS, BOLTS, ETC.), A SUITABLE LUBRICANT SHOULD ALWAYS BE APPLIED PRIOR TO TIGHTENING. THE USE OF HAND TOOLS CAN USUALLY PREVENT GALLING - BUT A LUBRICANT IS ALWAYS RECOMMENDED.
